WHAT IS CAPITAL FACTORY?

When they were founded in 2009, they were just a “co-working space.” But in 2018, they invited in the military. Now they have their hands in some of the most evil things on earth.

The military works out of Capital Factory year-round to find start-ups to help it expand its abilities to spy and kill.

They claim to be “the only place outside of the Pentagon where defense leaders can collaborate across all branches to solve today’s military challenges and future threats.”

CAPITAL FACTORY IS COMPLICIT

Capital Factory isn’t just a “space,” it’s an investor, too, and among others it invests in “defense” and “national security” companies.
